

2010-2011 Release Downtime Schedule Revised 5/14/2010

The Release Downtime Schedule is revised due to a change in our software delivery schedule. This impacts when the DF Releases will be installed. The DFs will be installed in February and July of 2011, instead of the originally scheduled March and August 2011 timeframes.

Release Down Time is from 3am to 9pm on each designated Saturday. However, most releases will be complete before noon on Saturday. Data Centers will be returned to production as soon as the release is complete. The exception to this will be the DF releases that occur twice a year. The Release Down Time for a DF will be from 3am Saturday until 9am Sunday.

September 11, 2010

October 9, 2010

November 6, 2010

December 4, 2010

January 8, 2011
