

Procedure: Pesticide Notification, Posting and Record Keeping

ESD 112 will periodically apply standard, homeowner style weed killers RoundUp, GroundClear, Weed Stop, etc.) to parking lots, sidewalks, near building foundations and signage, as needed. We do not apply any industrial or controlled chemicals on our properties.

Procedure 6895 will be printed and distributed upon request to employees, students and parents.

At least 48 hours before the application of a pesticide to facilities or grounds, the ESD will notify parents and employees of the planned application in writing, including the heading, "Notice: Pesticide Application." This notice will be posted in a prominent place in the building office in addition to being provided to parents and employees.

This pre-notification is not required if the ESD grounds or facilities will not be occupied by employees or students for two days following the application of the pesticide. If the application is not made within 48 hours of the notification, another notification will be made prior to the application. This pre-notification is not required in the case of any emergency application of pesticides to an ESD facility, such as an application to control stinging pests, but full notification will be made as soon as possible after the application.

Following the application of a pesticide to ESD facilities (structures and vehicles) a sign will be posted at the location of the application. The notice will be at least 8.5 x 11 inches in size, will include the heading, "Notice: Pesticide Application," and will state the product name; date, time and specific location of the application; the pest for which the application was made; and a contact name and telephone number. The notice will remain posted for 24 hours, or longer if required by the label of the pesticide.

Following the application of a pesticide to ESD grounds notice will be posted at the location of the application and at each primary point of entry to the grounds. The notice will be at least 4 x 5 inches in size and state that the landscape recently has been treated with a pesticide and provide a contact name and telephone number. The notice will remain posted for 24 hours, or longer if required by the label of the pesticide.

These notices are not required for the application of antimicrobial pesticides (substances used to sanitize or disinfect for microbial pests: viruses, bacteria, algae and protozoa). These notices are not required for the placement of insect or rodent bait that are not accessible to children.

Adoption Date: **10-28-2025**
