

n[√]Power Girls Cultivating achievement and interest in STEM

How do we reduce pet stress during their stay at the vet?

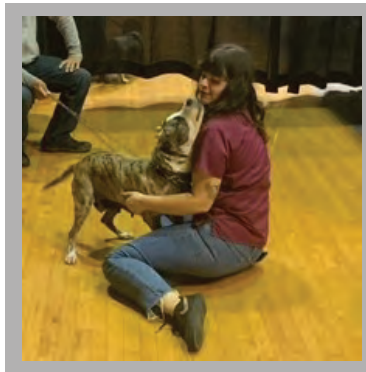

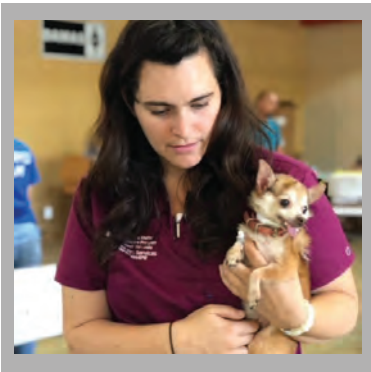

Tuesday, February 8th, 2022 at 5:30 PM

5th, 6th, 7th & 8th Grade Girls! Join the fun and find out!

Jordan, a Veterinary Technician, wants to explore ways to help pets and their people have the most comfortable experience possible when they visit. She's looking forward to sharing her world and hearing how you might solve challenges she faces.

Join us for the fun, the STEM or the chance to meet a Veterinary Technician.

Jordan travels to Puerto Rico where she does outreach work.

Jordan works at a local surgery and cancer care center where animals, like this golden retriever, can get specialized treatment.
