REACH is a program of  
Educational Service District 112

★★★★ Dallesport ★★★★★

## FUN ACTIVITIES:

We have had a great start to our program this year! We played lots of math and language arts related games such as Monopoly, Set, Sequence, Colorku, checkers, chess, and mancala, to name a few. We have also been reading poems – each student practiced reading their favorite poem and then copied and illustrated it. We used our scientific minds to observe little bits of nature, such as rocks, leaves, and weeds under a microscope. We have also been working on our engineering skills with Legos, Straw Connectors, Snap Circuit and Suspend, which is a building system that relies on having a steady hand and a good sense of balance. We built some amazing things!

## GUEST PRESENTERS:

We have welcomed several special guests to our program. Debi Budnick from the Skyline Community Hospital helped us practice our baking skills and taught us about nutrition. Megan Winn from the Klickitat County Health Department came and taught us about social skills and respecting personal space. We even got to build Rube Goldberg machines with our school's shop teacher, Mr. Wood!
